

Women Are Expert Pilots

Bring Shipping Through Dangerous Waters Around English Coast

It is not generally known that there are more than 100 women pilots among the 4,000 expert navigators who bring shipping through the dangerous waters that abound round the coasts of England. One of these, Mrs. Martha Jones of Holyhead, came recently into the public eye through her part in a drowning accident on the Welsh coast. She goes out in all weathers to pilot cargo "tramps" and schooners into the smaller ports on a very dangerous part of the coast.

Revenue From Forests

The direct revenues received by Dominion and provincial governments from the forests in the form of rentals, royalties, stumpage charges, etc., amount to \$15,000,000 annually. In Europe it has been found that increased expenditure on modern protective methods has always been followed by a much more than proportionate increase in revenues.

For 100 bushels of wheat—

That's about all the trip costs, and that's why thousands of people go to the Old Country for the Holidays—an unforgettable pleasure. Are you going?

The Anchor-Donaldson Steamer "Letitia" leaves Montreal for Scotland on November 26th. The Cunarder "Ausonia" leaves Montreal November 25th for the Channel Ports.

Special Christmas sailings from Halifax for the second week in December will enable you to arrive in plenty of time for plum puddings and haggis, bippies and pantomimes.

Round Trip from \$155.00 up, everything included. Children half fare. Your Steamship Agent will make all arrangements.

Mr. Trelle, Wembley, Alberta, farmer, was not content with winning both the wheat and oats championships of this continent at the International Grain Show at Chicago last year, but now is endeavoring to improve upon Canadian wheat standards generally by evolving a new variety of wheat altogether. For this he is entitled to commendation.

Mr. Trelle is at work on an unnamed wheat, known for the present as "Mystery Wheat." He claims that it equals the best wheat now known and has the great advantage of ripening some 15 to 18 days earlier. This wheat, ripening so much earlier, is expected to almost eliminate the danger of frost that sometimes seriously damages Marquis. According to Mr. Trelle, his new wheat is easily on a par with Marquis and, furthermore, is a wheat that can be mixed and marketed with Marquis without lowering the standard. There is also claimed for the new wheat another advantage and that is that it will make it possible for Canadian wheat to reach the world market fully two weeks earlier than is now the case.

These are all important considerations. Marquis wheat has been a great thing for the West. This variety, discovered by Dr. Charles E. Saunders, has added to the productivity of the prairies by millions upon millions of dollars annually. Garnet wheat has also become promising, and, because of its ripening earlier, is calculated as likely to extend the grain growing area much farther north. Now comes the possibility of still another wheat, of equally promising merits, in the discoveries and experiments of Herman Trelle. A man who can win the wheat and oats championships of the continent in one and the same year and then turn around and produce a type of grain that may possibly revolutionize the wheat growing industry of the West, truly is an agriculturist of rare worth. Mr. Trelle will be wished well in his experiments and all three prairie provinces will await further reports thereon.—Regina Leader.

Lord, we are waiting, waiting, waiting."

Helmi swayed nearer to her and gently replaced the keys in Mrs. Wymuth's pocket, falling back on her knees in a rapture of thanksgiving and relief. And in the general responsive outcries of the girls Helmi, too, joined. But the words of her song were the words of one of the yells of the

"Merry Malds"—

"Skin a mir inka! Skin a mir inka! Skina mir inka doo! I love you!"

Fortunately for Helmi, Mrs. Wymuth attributed her strange words to her foreign birth, and in her joy at Helmi's apparent surrender she did not inquire closely into the matter. Helmi's silence was broken! Now for the full confession—the stubborn will had yielded at last.

The other girls were sent into the common room, where they began their dreary task of making baby clothes in shamed silence. Although the Wymuth's had been at the home only a short time they had killed every spark of happiness in it. Mrs. Avery had imbued the girls with a certain gaiety and enthusiasm over their sewing which had lifted it out of all sadness. A baby was to her a sacred gift; it must be made welcome! and baby clothes must be beautiful. The girls loved the two hours after supper when the little garments were fashioned. Indeed, the beautiful things that Mrs. Avery had planned and the girls had made were used against her by members of the Board, who claimed that she encouraged the girls to forget that they were sinners, and had them actually looking forward to the coming of their babies, forgetting that they were children of shame.

The Wymuth's let the girls forget nothing, and on this night they were silent and sad, as bitterly cast down and ashamed, as any Christian Board could wish!

For an hour Mr. and Mrs. Wymuth struggled with Helmi. They prayed coaxed, threatened. She must tell! Mr. Wymuth at last shook her roughly—he had often said this was the best way to deal with foreigners. They had to be mastered.

Something broke in Helmi then. The nervous excitement of the evening—her three precious letters that she had not yet opened—her anxiety for Minnie, and eagerness to know what her letter contained of good or evil—something broke in Helmi's heart with sudden fury. It was that flashing temper for which her countrymen are noted. One moment she had been perfectly calm, tight-lipped, composed, mistress of herself, determined to bear all things; the next moment she was a flaming fury, with murder in her eyes. She hurled Mr. Wymuth from her with a swinging blow that sent him crashing into the china cabinet, and the words she said were words she had not known that she knew. In the hotel in Saint Paul she had heard the chit-chat to a persistent peddler at the door. "You go to Hell!"

Mrs. Wymuth screamed in genuine, honest fright.

CHAPTER IX.

"Girls! Oh, Girls!"

Mrs. Wymuth's voice was fraught with terror and brought the girls from the common room in a panic.

"Oh, you wicked, wicked girl, Helmi! You have killed the best man the sun ever shone on! He is bleeding to death, his life oozing away!" Her

voice, which always had a rusty whine, now fairly croaked.

The glass in the door of the cabinet had given Mr. Wymuth a cut in the cheek, and the blood ran over his pale face. Helmi, wide eyed and rigid, stood as if rooted to the floor.

"Murder! murder! murder!" Mrs. Wymuth's voice was rumbling now like distant thunder. "Oh, speak to me, Mr. Wymuth." Even in her excitement she remembered that it would not do to call him by his first name before the girls—in life or in death, discipline must be preserved. "Speak, oh speak, pale lips!"

The pale lips spoke. Mr. Wymuth's thin veneer had been cracked by Helmi's blow. "Shut up, you fool, and get me something to wipe off the blood," he said.

"He raves," cried his wife dramatically. "Go, girls, go! When he wakes—if he ever does wake in this life—he must see no face but mine bending over him. Go!"

The girls drifted noiselessly up the stairs, deeply awed by what had happened. Helmi suddenly remembered the letters she had concealed, and ran upstairs to find Minnie, who had gone to bed early. When Helmi reached the dormitory she found herself the centre of an admiring throng. "Gosh, I'm glad you pasted him!" cried one. "Helmi, ain't you the best girl," said another.

"Serves him right, the big bum," was Rose Lamb's contribution. "I wish I had your nerve, Helmi. If I wallowed me no fair last week, and I was afraid to hit back. But Gee! he hadn't a look in with our husky Helmi."

Minnie had awakened with the noise and was sitting up in bed, very pale and frightened, when the girls swarmed into the room. Helmi put the letter in her hand.

Possibly the popularity of air castles is due to the fact that they are not taxable.

Noble birth is one thing and a nice, soft political birth is another.

The Latest In Wheat Experiments

Mystery Wheat, By Ripening Earlier, May Prove Of Inestimable Benefit

Herman Trelle, Wembley, Alberta, farmer, was not content with winning both the wheat and oats championships of this continent at the International Grain Show at Chicago last year, but now is endeavoring to improve upon Canadian wheat standards generally by evolving a new variety of wheat altogether. For this he is entitled to commendation.

Mr. Trelle is at work on an unnamed wheat, known for the present as "Mystery Wheat." He claims that it equals the best wheat now known and has the great advantage of ripening some 15 to 18 days earlier. This wheat, ripening so much earlier, is expected to almost eliminate the danger of frost that sometimes seriously damages Marquis. According to Mr. Trelle, his new wheat is easily on a par with Marquis and, furthermore, is a wheat that can be mixed and marketed with Marquis without lowering the standard. There is also claimed for the new wheat another advantage and that is that it will make it possible for Canadian wheat to reach the world market fully two weeks earlier than is now the case.

These are all important considerations. Marquis wheat has been a great thing for the West. This variety, discovered by Dr. Charles E. Saunders, has added to the productivity of the prairies by millions upon millions of dollars annually. Garnet wheat has also become promising, and, because of its ripening earlier, is calculated as likely to extend the grain growing area much farther north. Now comes the possibility of still another wheat, of equally promising merits, in the discoveries and experiments of Herman Trelle. A man who can win the wheat and oats championships of the continent in one and the same year and then turn around and produce a type of grain that may possibly revolutionize the wheat growing industry of the West, truly is an agriculturist of rare worth. Mr. Trelle will be wished well in his experiments and all three prairie provinces will await further reports thereon.—Regina Leader.

An Everyday Story

—Evans Studio

Francis Henry Cook

London, Ont.—"I was in a general run-down state of health, I had indigestion and my stomach was weak and so sore I could not bear to touch it. I got if any one could, it would have been me. This is a jail, really, only it's a jail where they're going to convert you or bust. It's best to get converted first thing. I've been converted lots of times; every time I run away I get converted all over again. Gee! I'm getting fed up with these Wymuths! Ain't this a swell time we're havin' tonight! I'm all for Helmi, —she's as good as a show." Rose began to sing.

(To Be Continued.)

It's a wonder that more men don't become round-shouldered from stooping to folly.

Oh, you wicked, wicked girl, Helmi! You have killed the best man the sun ever shone on! He is bleeding to death, his life oozing away!" Her

The better the quality of the tea you use the more important it is that the container should be the very best. By careful tests it has been proven that Aluminum is the best container yet found for tea—and Red Rose Tea is packed only in Aluminum—the finest package ever used for tea.

ST

Local Possibilities

Home Neighborhood Usually Offers Better Chances Than Elsewhere

Many folks will start off to some far distant city or state to seek their fortunes when there are equally good or better chances in the home neighborhood. The chance to make good in one's home location is usually better, since people understand local conditions more thoroughly. They also have friends in their home locality who will be of assistance in developing any kind of business. There are opportunities for business everywhere and they are just as good as elsewhere. The people who render superior service and who advertise what they can do will always attract attention and go ahead.

These are all important considerations.
